

I think we can all agree that one of the best ways to bring equity to education in NM is to increase reading levels of students who need years of catch-up growth.

You and your colleagues are invited to an upcoming professional development opportunity where you'll learn about the physical processes of reading and how it impacts student learning. Research results from over half a million students will be reviewed along with how these results impact learning. You'll also hear how schools in New Mexico improved students' reading efficiency and achieved up to 2.5 years of growth in one school year.

The virtual event is hosted by Reading Plus and takes place on Wednesday, October 14 from 1:00 p.m. to 2:00 p.m. MT. **You can register for free here** www.readingplus.com/new-mexico. In addition, all attendees will receive a certificate of attendance.

We hope to see you there!

I appreciate your assistance with this promotion. Please be in touch with questions.
